

DOME COVER SEALS FOR TANK WAGONS [DD13]

2636GE19

Dome cover seals for tank wagons ensure a secure seal and prevent hazardous substances from escaping during transportation. They are indispensable for the safe handling of chemicals, liquids and gases.

Dome cover seals [DD13] for tank wagons offer a reliable solution for the safe transportation of hazardous liquids and gases.

Thanks to their adaptable and elastic design, the Gaskets adapt perfectly to the requirements of a wide range of applications.

They are made of high-quality, textured glass fibers and are provided with a special impregnation and a diffusion-resistant PTFE film. This combination ensures outstanding cross-sectional tightness, even with low cover pressures. At the same time, the Gasket remains flexible, guaranteeing a long service life and reliable performance. Ideal for use in demanding transportation conditions - with maximum safety and efficiency.

Standard dimensions 488 x 532 x 14 mm [other dimensions on request].

Features

Chemical resistance [pH]	0-14
--------------------------	------

Operating data

Temperatur [min]	-200 °C
Temperatur [max]	260 °C
Pressure [max]	10 bar

Applications

Water, Process water, Lake water	suitable
Mineral oils, animal fats	suitable
Heat carrier oils, synthetic oils	suitable
Alcalia diluted, salt solutions	suitable
Alcalia concentrated	suitable
Inorganic acids diluted, salt solutions	suitable
Inorganic acids concentrated	suitable
Solvents, other organic compounds	suitable
Lacques, colors [silicone -free]	suitable

General information: All information given in this Technical Information sheet represents our current level of knowledge and serves as information on our products and their respective scopes. It is not meant to ensure any particular properties of any product or the suitability of any product for any specific application, neither does it create any liability on our part. © Copyright by IDT

Forms of delivery

Ready-to-install ring

Additional information

Notes

Dissolved or molten alkali metals and elemental fluorine are excluded from chemical resistance.
