

RUBBER-STEEL GASKET G-ST-P/KN (FPM)

0285GS30

The rubber-steel seal G-ST-P/KN is specially designed for use in the force shunt. It consists of a sealing lip with an O-ring, which is seated on an external steel ring. High surface pressures are absorbed by the steel ring, so that the elastic sealing lip is not subjected to excessive loads. At the same time, the blow-out safety and stability of the sealing system is increased.

Operating data

Temperatur [min]	-20 °C
Temperatur [max]	200 °C
Pressure [max]	100 bar
